

Sprint 5 Retro

Sepid Ghorbani's Team

11 Topics - 0 New Tasks - 11 Reflections - 3 Participants

- 🧠 **Deep Data Understanding:** The team emphasized that truly grasping the data is more crucial than hastily moving to modeling. Senior management might consider allocating resources for deeper analytics training or ensuring sufficient time is dedicated to comprehensive data reviews before development phases.
- 📋 **Establishment of Clear Rubrics:** The mention of "Rubrics" indicates a need for well-defined criteria to guide project work and quality assessments. It would be beneficial to standardize these metrics, ensuring the team has clear, objective benchmarks for success.
- 🚧 **Addressing Identified Gaps:** The team's hope for the next sprint to “make up for current gaps” highlights areas needing improvement. Senior management could focus on providing targeted support or resources to help the team overcome these challenges promptly.
